

# SHOWCASE PREP

 SUGGESTED TIME  
30-45 MINUTES

## OBJECTIVES

By completing this activity, students will:

- + work on their final project drafts and prepare for the final project showcase

## ACTIVITY DESCRIPTION

- Remind students that they will be sharing their projects with each other (and possibly guests) as a way of acknowledging the hard work that has taken place and of reflecting on their experiences. Explain that this session is an opportunity for finalizing their works-in-progress and coming up with a strategy for sharing their projects with others.
- Give students time to work on their projects and prepare for presenting final drafts at the project showcase. Optionally, collect final works-in-progress into a class studio for ease in presenting. Optionally, invite students to add their projects to the Hackathon studio.
- Distribute the Project Reflections handout to students and discuss the What?, So what?, Now what? framework as a way for them to present their experiences to others.

## RESOURCES

- Project Reflections handout
- Hackathon studio  
<http://scratch.mit.edu/studios/488267>

## REFLECTION PROMPTS

- + What is your project?
- + What was your process for developing the project?
- + What do you want to create next?

## REVIEWING STUDENT WORK

- + Did each group or individual complete a Project Reflections handout?

## NOTES

- + Students may be feeling anxious or stressed about completing their projects. This is an opportunity to remind them that: (1) this experience is just a waypoint on their paths as computational creators, and (2) some types of stress can be good, helping us to focus on our goals and get things done!
